

# Protuber

7-24-6 with micronutrients

LIQUID STARTER

## recommendations

- **Protuber** is a liquid nutrient specifically designed for localized fertilization of the potato. **Protuber** improves and stimulates root development. It should be used based on soil analysis. **Protuber** should not be used to meet the crop requirement for B or Zn in case of severe deficiencies. For other crops, consult your agricultural representative.

## usage

- Application in furrows of potato seedlings
- Works well in combination with insecticides and fungicides (check compatibility)
- Better tuber development (potato)

density **1.370 kg/L**

Guaranteed minimum analysis			
Total nitrogen (N)	7%	Boron (B)	0.01%
Available phosphoric acid (P <sub>2</sub> O <sub>5</sub> )	24%	Non plant food ingredient: 0.002% indole-3-butyric acid (IBA).	
Soluble potash (K <sub>2</sub> O)	6%		
Zinc (Zn) (chelated)	0.15%		

## Application rates

Crop	Application rate
Potato	Apply 20 L/ha (2.1 gallons US/acre) of <b>Protuber</b> in the furrow with the planter at planting making sure that <b>Protuber</b> is in contact with the seed.  <b>Protuber</b> can be applied alone or diluted in 50-140 L of water/ha (13-37 gallons US/acre) when combined with fungicides/insecticides.

## Method of mixing Protuber

- As required, fill half of the tank with water.
- Start agitation.
- Add fungicide/insecticide (follow the manufacturer's recommendations).
- Add the remaining volume of water.
- Add the recommended rate of **Protuber** and maintain agitation before and during application.

**Mixing.** Shake well before using. Fill the tank three quarters full. Start agitation and add the fertilizer. Clean the empty containers and add the rinsing water to the tank. Add the rest of the water and apply without delay.

**Compatibility.** This product is compatible with most pesticides and liquid fertilizers except calcium. Check compatibility before mixing in application tank or check with your distributor. **Check compatibility as follow.** In a clean, transparent jar, add the water and other products, one by one in the same proportion as proposed application. Agitate gently. Let the jar sit for 30 minutes. Incompatible products will form flakes, sludge, gels or other precipitates. Separation or layering may appear.

**Storage and disposal.** Avoid freezing. Do not pile up more than three containers. **Keep out of the reach of children and pets.** Keep container tightly closed in a well-ventilated area. Do not apply directly to water streams and ponds. Do not contaminate water by rinsing equipment or by waste disposal.

**Safety.** Always wear gloves and safety glasses when handling the concentrated product. **In case of contact with eyes,** flush with plenty of water. Seek medical assistance. **In case of contact with skin,** wash with clean water. **In case of ingestion, if victim is conscious,** give two glasses of water and induce vomiting. Seek medical assistance.

**Caution.** This fertilizer contains zinc and boron and should be used as stated by this label. It may prove harmful when misused.

**Guaranty.** The vendor's liability will be limited to the terms of this label. The buyer will then be responsible for all risks and damages to persons or properties resulting from the use of this product, and hereby accepts these conditions.
